Education

Technical University of Munich

M.Sc. Management & Technology

Munich, Germany

October 2026 – Present

- Specialization: Computer Engineering (major) and Economics & Econometrics

Middle East Technical University

B.S. Industrial Engineering (GPA: 3.45/4.00, Honors)

Ankara, Türkiye

September 2019 – June 2025

- Senior System Design Project: Dynamic Planning of Shared Scooter Field Operations
- Activities: METU Productivity Club, Taekwondo Team

TED Eskisehir College

High School Diploma (Graduation Score: 98.23/100)

Eskisehir, Türkiye

September 2015 – June 2019

- Full tuition merit scholarship, awarded for the top result in the high school entrance exam.

Experience

Invent.ai

Junior Business Analyst

Ankara, Türkiye

October 2025 – Present

- Working within the Product Management team on pricing, promotion, and markdown optimization products, conducting data and decision analysis on large retail datasets to support product development.
- Designed and implemented an AI reasoning agent pipeline for markdown optimization, integrating SQL-based decision analysis with LLM inference to produce explainable model outputs.
- Worked on the AI assistant flow and insight layer of a merchandise assortment planning (MAP) product, turning last season data into insights, risk warnings, and recommended actions for planners.
- Delivered monthly product development updates to management, prepared product documentation, and tracked feature delivery through development cycles.

Yapı Kredi Teknoloji

Assistant Business Analyst

Istanbul, Türkiye

July 2025 – September 2025

- Contributed to software development life cycle within the Digital Channels Assets and Insurances team.
- Owned the open banking feature in the bank's mobile app from analysis to release: authored the functional analysis document, coordinated development with the software team, managed the test and UAT cycles, and delivered it to production.

Business Analyst Intern

February 2025 – June 2025

- Collaborated on Agile projects employing Scrum methodology to analyze and model data, design test scenarios, and conducted user acceptance testing, using tools like SQL, JIRA, Confluence, and Kibana.

Hop Teknoloji

Senior System Design Project Team Member

Ankara, Türkiye

October 2024 – June 2025

- Designed a decision support system for a shared e-scooter operator's 2,000-vehicle field operation, prioritizing and sequencing battery swaps and vehicle repositioning within each shift.
- Replaced manual routing with an optimization-based approach, improving field productivity by 70.4% in tasks per kilometer driven and reducing scooters left stranded at critical battery levels by 40%.

University of Groningen

Research Intern

Groningen, Netherlands

July 2024 – August 2024

- Worked on a research project at the Probability and Statistics unit of the Bernoulli Institute for Mathematics, Computer Science and Artificial Intelligence, through the Erasmus+ programme.
- Applied network analysis and operations research methods, including graph theory, stochastic processes, and optimal transport, to investigate random nanowire networks and translate mathematical insights into practical design implications.

Middle East Technical University

Student Assistant

Ankara, Türkiye

March 2024 – June 2024

- Student assistant for IE266 Engineering Statistics, a compulsory course in the Industrial Engineering curriculum; prepared study sets for the 2024 Spring semester.

Bilkent University

Undergraduate Researcher

Ankara, Türkiye

May 2023 – February 2024

- Worked on the project ‘Active Learning in Large Scale Vector Optimization Problems’ under 2247-C Intern Researcher Scholarship Program by Scientific and Technological Research Council of Türkiye (TÜBİTAK), supervised by Assoc. Prof. Cem Tekin.
- Conducted research on mathematical optimization methods including Bayesian optimization, evolutionary algorithms, and active learning for multi-objective black-box problems.

Bosch

Project Intern

Bursa, Türkiye

July 2023 – September 2023

- Worked on digitalization projects as a part of the Bosch Summer School Program, within the Quality Management and Methods Department.
- Designed a Microsoft Power Apps UI that digitized FMEA data capture during production line walks, replacing paper forms with structured entry.
- Analyzed the collected quality data and built an interactive Power BI dashboard tracking fail rates by station and defect category across automated and manual lines.

Volunteering

METU Productivity Club

Administrative Board Member

Ankara, Türkiye

May 2022 – March 2023

- Project leader of W'EQUAL, an initiative raising awareness of inequalities people encounter in social, personal, and professional life.
- Organized a seminar with 14 speakers and 1000+ registrations, directed a 55-member organization team, arranged the schedule, contacted speakers, and secured sponsorship.

Project Team Member

October 2021 – May 2023

- Part of the organization team for club events, secured sponsorships, and attended weekly project meetings.

Coursera GTC (Global Translator Community)

Translator

October 2020 – October 2022

- Translated courses into Turkish from English and Korean, including ‘Gender, Family, and Social Change in Contemporary South Korea’ and ‘Mathematics for Machine Learning and Data Science’.

Test Scores

IELTS Academic Overall Band Score: 8 (CEFR Level: C1)

January 2025

British Council, IDP Education, Cambridge Assessment English

Test of Proficiency in Korean (TOPIK II) 200/300 5급

November 2024

National Institute for International Education (NIIED)

Skills

Business Tools: Microsoft Office Programs (Excel, PowerPoint, Power BI, Power Apps, etc.), Tableau, JIRA, Confluence, Kibana

Analytics & Programming: Python (pandas, NumPy, Pyomo), SQL, Gurobi/CPLEX, Excel Solver, R, MATLAB, ARENA, Minitab

Languages: Turkish (Native), English (Advanced, C1, IELTS 8), Korean (Advanced, TOPIK II Level 5), French (Elementary, A2), German (Beginner)
